

DEMS

Polyurethane moulded components

POLYURETHANE MOULDINGS

We offer technical expertise in component and tooling design, as well as the correct material specifications for the appropriate application and part performances. DEMS can custom formulate the entire range of polyurethane compounds and colours for your exact application. We have the ability to supply components in various forms, - either in a flexible or ridge form, no matter what the application is.

Over the years we have devised ways to manufacture basic inexpensive Proto-Type tooling to assist in R&D expenditure. Once the project reaches the production phase, we are then able to manufacture Hi-volume Hi-performance production tooling. DEMS have a fully equipped Tool Room where all our tooling is designed and manufactured in-house at DEMS, ensuring we keep the tooling cost down to a bare minimum for our customers.

DEMS are very capable of moulding polyurethane to metal parts as well as a host of engineering plastics, successfully to satisfy clients requirements.
